* = Includes motor amps

** = Ratings shown are for 240V, 208V amperage is 86% of 240V value.

Models shown as 1 and 3 phase are factory wired for 3 phase operation and can be field wired for single phase.

GENERAL

IMPORTANT: SAVE THESE INSTRUCTIONS

⚠ WARNING

Risk of fire. Do not use as a residential or household heater.

⚠ WARNING

Hazard of Fire or Discoloration of Temperature Sensitive Fabrics. Do not use as a residential or household heater. Keep combustible material and

such fabrics away from heater. Do not operate heater where flammable vapors, gases or liquids are present. Heaters in the heat mode should not be operated in room temperatures above 80°F. Fan motor is not designed to operate in ambients below -40°F.

To avoid personal injury read "IMPORTANT INSTRUCTIONS" on page 2 before installation or operation of heater.

⚠ WARNING

Keep electrical cords and combustible materials, such as drapes and other furnishings, away from heater.

IMPORTANT INSTRUCTIONS

When using electrical appliances, basic precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Read all instructions before using this heater.
2. This heater is hot when in use. To avoid burns, do not let bare skin touch hot surfaces. If provided, use handles when moving this heater. Keep combustible materials, such as furniture, pillows, bedding, papers, clothes, and curtains at least 3 feet (0.9 m) from the front of the heater and keep them away from the sides and rear.
3. Extreme caution is necessary when any heater is used by or near children or handicapped individuals and whenever the heater is left operating and unattended.
4. Always disconnect heater when not in use.
5. Do not operate any heater with a damaged cord or plug or after the heater malfunctions, has been dropped or damaged in any manner. Return heater to authorized service facility for examination, electrical or mechanical adjustments, or repair.
6. Do not use outdoors.
7. This heater is not intended for use in bathrooms, laundry areas and similar indoor locations. Never locate heater where it may fall into a bathtub or other water container.

8. Do not run cord under carpeting. Do not cover cord with throw rugs, runners or the like. Arrange cord away from traffic area and where it will not be tripped over.
9. To disconnect heater, turn thermostat off, then remove plug from outlet.
10. Connect to properly grounded outlets only.
11. Do not insert or allow foreign objects to enter any ventilation or exhaust opening as this may cause an electric shock, fire or damage the heater.
12. To prevent a possible fire, do not block air intakes or exhaust in any manner. Do not use on soft surfaces, like a bed, where opening may become blocked.
13. A heater has hot and arcing or sparking parts inside. Do not use it in areas where gasoline, paint or flammable liquids are used or stored.
14. Use this heater only as described in this manual. Any other use not recommended by the manufacturer may cause fire, electric shock or injury to persons.
15. This heater is not intended for use with an extension cord.
16. **SAVE THESE INSTRUCTIONS.**

ASSEMBLY INSTRUCTIONS

The Chromalox DRA is shipped fully assembled. The handle is assembled in the lower position (dotted line Fig. 1). To position handle in the upright position, remove bolts securing the handle to the support legs, lift handle until the handle holes line up with the upper holes in the support legs and insert bolts to secure the handle in the full upright position.

- Tools Required
- Crescent Wrench
 - Phillips Screwdriver

Figure 1

WIRING

⚠ WARNING

ELECTRIC SHOCK HAZARD. Disconnect all power before installing or servicing heater. Failure to do so could result in personal injury or property damage. Heater must be effectively grounded in accordance with the National Electrical Code, NFPA 70.

1. Use heater only on the voltage and frequency specified on the nameplate.
2. All wiring should be done in accordance with local codes and the National Electrical Code by a qualified person.
3. Branch circuit wire for connection to heater must be at least 90°C wire.

4. The top access panel is secured by 4 screws that must be loosened to gain access.
5. A ground terminal is provided near the power terminal board. The ground wire should be connected before other connections are made.
6. Refer to Chart A for proper size "SO" grade cable.
7. A proper strain relief must be used with "SO" grade cable.
8. Dragon heaters are factory pre-wired for 3-phase delta operation. Some units can be converted to single phase operation by changing the wiring. Refer to Chart A for those heaters that can be converted to single phase. The appropriate wiring diagram is also located on the back of the wiring compartment cover.

.390"-.775"	Non Locking	PGN-15-20	3 Pole, 4 Wire	250	20		15-20	C73.59
.750"-1.250"	Non Locking	PGN-15-50	3 Pole, 4 Wire	250	50		15-50	C73.61

The above plugs are designed to be used with specific ranges of cable diameters. If not used with Chromalox Cable Kits, check cable manufacturers cable diameter to be sure plug fits selected cable.

WIRING

Cord Preparation for Chromalox Portable Heaters

- Determine the gage and number of conductors from the tabulation below using amps and phase from the heater nameplate. It is not recommended that cord exceed 50 feet in length.

Max. Heater Amps	Chromalox Cord Kit*	Cord Ga./No. Cond. and Type	
	Model No.	1 Phase	3 Phase
15	PLC-2514-4		14/4 SO
20	PLC-2512-4		12/4 SO
30	PLC-2510-3	10/3 SO	
25	PLC-2510-4		10/4 SO
40	PLC-2508-3	8/3 SO	
35	PLC-2508-4		8/4 SO
55	PLC-2506-3	6/3 SO	
45	PLC-2506-4		6/4 SO
60	PLC-2504-4		4/4 SO

*Includes 90 degree fitting and 25 foot of cord, reducers and locknut

- Strip off outer jacket of cord and insulation from lead wires. The tabulation below provides the strip dimensions for the various Chromalox portable heaters. See the nameplate on the heater for the Model number.

Model No.	A	B	C
DRA - (all suffixes)	8"	1"	0.5"

- Slide fitting onto cord and tighten knurled nut to secure fitting to cord.
- Select plug to match electrical rating of cord.
- On opposite end of cord prepare end as directed by instructions that are provided with the plug.
- Attach cord assembly to heater as shown in Fig. 2 below:

Run wire tie through slots in bracket and over cord. Pull tab of wire tie to provide cord strain relief.

Figure 2

OPERATION

THERMOSTAT

Heaters include a bimetal thermostat for the automatic control of the exiting air temperature. The thermostat knob controls the heating elements and fan functions. The heater and fan are de-energized with the knob in the extreme clockwise position.

Turning the knob clockwise from the off position to the fan position will energize the fan only, for use in summer cooling.

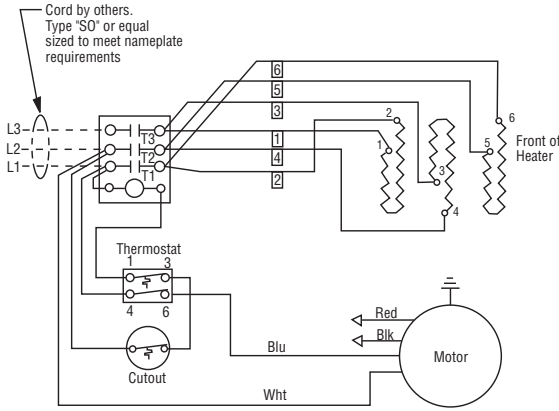

The adjustment knob controls power to the heater and fan when turned further in the clockwise direction, with the highest temperature setting in the extreme clockwise position.

The temperature setting in the heater mode is approximately 40°F in the low setting and 100°F at the highest setting.

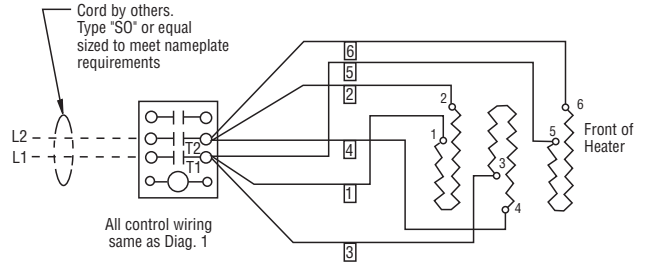

Note: The adjustment knob should be turned to the fan only setting after use for heating. The fan should be left on for at least 3 minutes to remove residual heat from the unit and to prevent overheating of the housing.

WIRING DIAGRAMS

Diag. 1 – FACTORY WIRED 3 PHASE

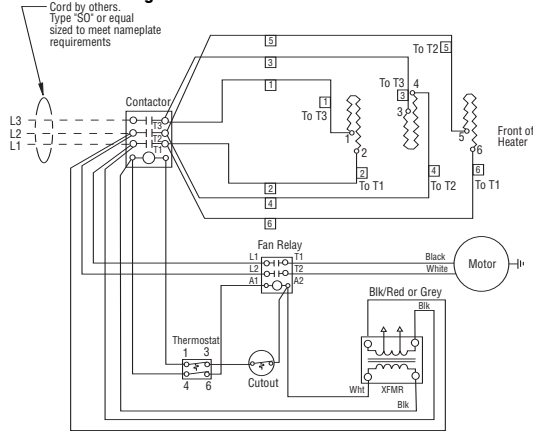

Diag. 1a – FIELD CONVERSION TO 1 PHASE

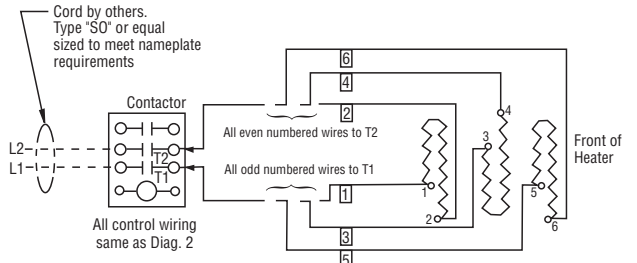

- All control wiring same as Diag. 1
- Instructions:
1. Loosen screws on load side of contactor. Remove all lead wire.
 2. Insert lead wires numbers 1, 3, and 5 into box lug connector "T1". Tighten screws on box lug connector.
 3. Insert lead wires numbers 2, 4, and 6 into box lug connector "T2". Tighten screws on box lug connector.
 4. Examine wiring to make certain it is per above diagram.

Diag. 2 – FACTORY WIRED 3 PHASE

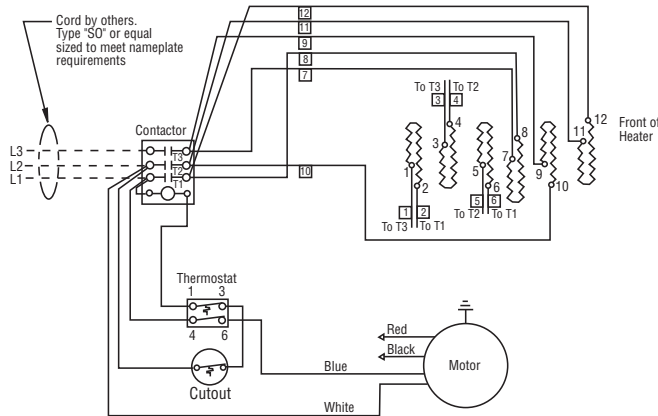

Diag. 2a – FIELD CONVERSION TO 1 PHASE

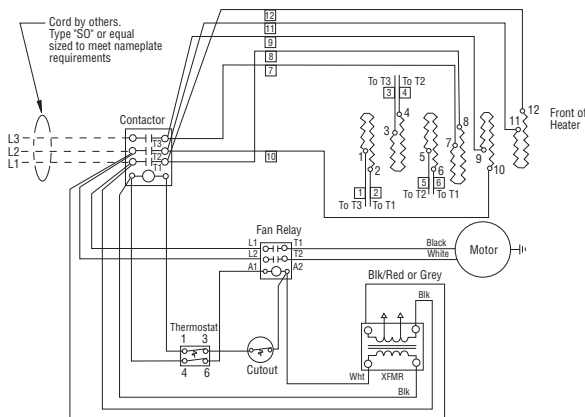

- All control wiring same as Diag. 2
- Instructions:
1. Loosen screws on load side of contactor. Remove all lead wire.
 2. Insert lead wires numbers 1, 3, and 5 into box lug connector "T1". Tighten screws on box lug connector.
 3. Insert lead wires numbers 2, 4, and 6 into box lug connector "T2". Tighten screws on box lug connector.
 4. Examine wiring to make certain it is per above diagram.

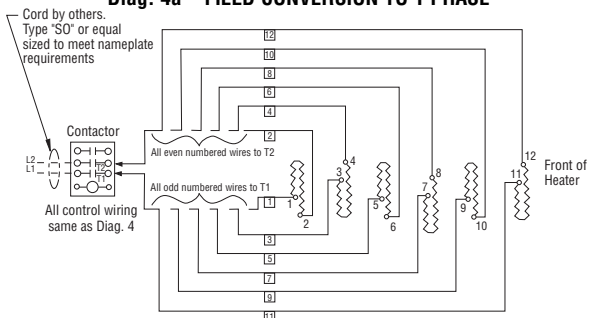

Diag. 3 – FACTORY WIRED 3 PHASE

Diag. 4 – FACTORY WIRED 3 PHASE

Diag. 4a – FIELD CONVERSION TO 1 PHASE

- All control wiring same as Diag. 4
- Instructions:
1. Loosen screws on load side of contactor. Remove all lead wire.
 2. Insert lead wires numbers 1, 3, 5, 7, 9 and 11 into box lug connector "T1". Tighten screws on box lug connector.
 3. Insert lead wires numbers 2, 4, 6, 8, 10 and 12 into box lug connector "T2". Tighten screws on box lug connector.
 4. Examine wiring to make certain it is per above diagram.

MAINTENANCE

⚠ WARNING

ELECTRIC SHOCK HAZARD. Disconnect heater from power supply before servicing and/or inspecting the heater; failure to do so may result in electrical shock.

Replace or repair damaged cords or plugs immediately. Check tightness of all electrical connections prior to energizing Dragon. Blow out or vacuum away any dirt or debris that may have accumulated around the control enclosure fan motor or heating elements.
